## EXECUTIVE SUMMARY

Mackin has prepared this executive summary to highlight the improvements made during the library infusion at the end of FY 2013. The report focuses primarily on the areas of collection size and collection age. Please refer to the comparison data on the following pages for the District of Columbia School Library collections. Future budgetary considerations are also included under recommendations.

### Collection Size

| Current Size                        | Size Prior to Infusion              | Increase                          |
|-------------------------------------|-------------------------------------|-----------------------------------|
| 18 items per student – K-12 overall | 15 items per student – K-12 overall | 3 books per student K-12 overall  |
| • 20 items per student – Elementary | • 18 items per student – Elementary | • 2 books per elementary student  |
| • 15 items per students – Secondary | • 9 items per student – Secondary   | • 6 books per high school student |

*Note: 20 Items per Student (IPS.) The national average<sup>1</sup> is 20 IPS and is recommended as your Goal Collection Size.*

Improvements: The secondary schools show considerable improvement and currently are at 15 IPS, an increase in 6 books per student across DCPS.

### Collection Age

| Current Average Age                   | Average Age Prior to Infusion         | Increase                      |
|---------------------------------------|---------------------------------------|-------------------------------|
| 14 years old – K-12 Average Copyright | 17 years old – K-12 Average Copyright | 3 years newer across K-12     |
| • 15 years old - Elementary           | • 16 years old - Elementary           | • 1 year newer at Elementary  |
| • 4 years old – Secondary             | • 19 years old – Secondary            | • 15 years newer at Secondary |

Improvements: The secondary schools again show considerable improvement. Prior to infusion, books on average were far OLDER than the students at the middle and high schools. Currently, these schools have titles averaging 4 year old copyright dates with current information for research.

## **Recommendations**

1. Overall your analysis indicates a current shortage of 322,280 items for your district. Part of that need is to reach the 20 Items/Student goal at every school. The remainder is necessary to balance the collections throughout the content areas. For budgeting purposes, if the additional 322,280 titles were to be purchased to reach the balanced collection distributions, it would cost approximately \$6.2 million.<sup>2</sup>
2. Secondary schools show a huge transformation over the last year. Most of the secondary schools are now current with their material. However, 24 schools need additional numbers to meet the 20 books/student goal.
3. Elementary schools continue to show need for enhancement. Only one elementary school has a copyright average within the last 10 years. Most elementary schools have an average collection 15 years or older. This average age is significantly older than the students at these schools. Furthermore, 38 elementary schools are below the 20 books/student goal.

<sup>1</sup>National Center for Education Statistics, 2006 [http://nces.ed.gov/programs/digest/d06/tables/dt06\\_417.asp?referrer=list](http://nces.ed.gov/programs/digest/d06/tables/dt06_417.asp?referrer=list)

<sup>2</sup>Based on average prices as compiled by School Library Journal, we currently use \$19.38 as an overall average price per title for budgeting purposes. Mackin prices are typically discounted and do not necessarily reflect this amount.

### Column Definitions

The number of students in the school as provided by Pat Brown

Total titles in collection that are classifiable with recognized call numbers

Recommended number of items is based on 20 IPS

Additional items needed is the total of the Dewey 10's additional needed. Overall Dewey 100s may meet recommendations

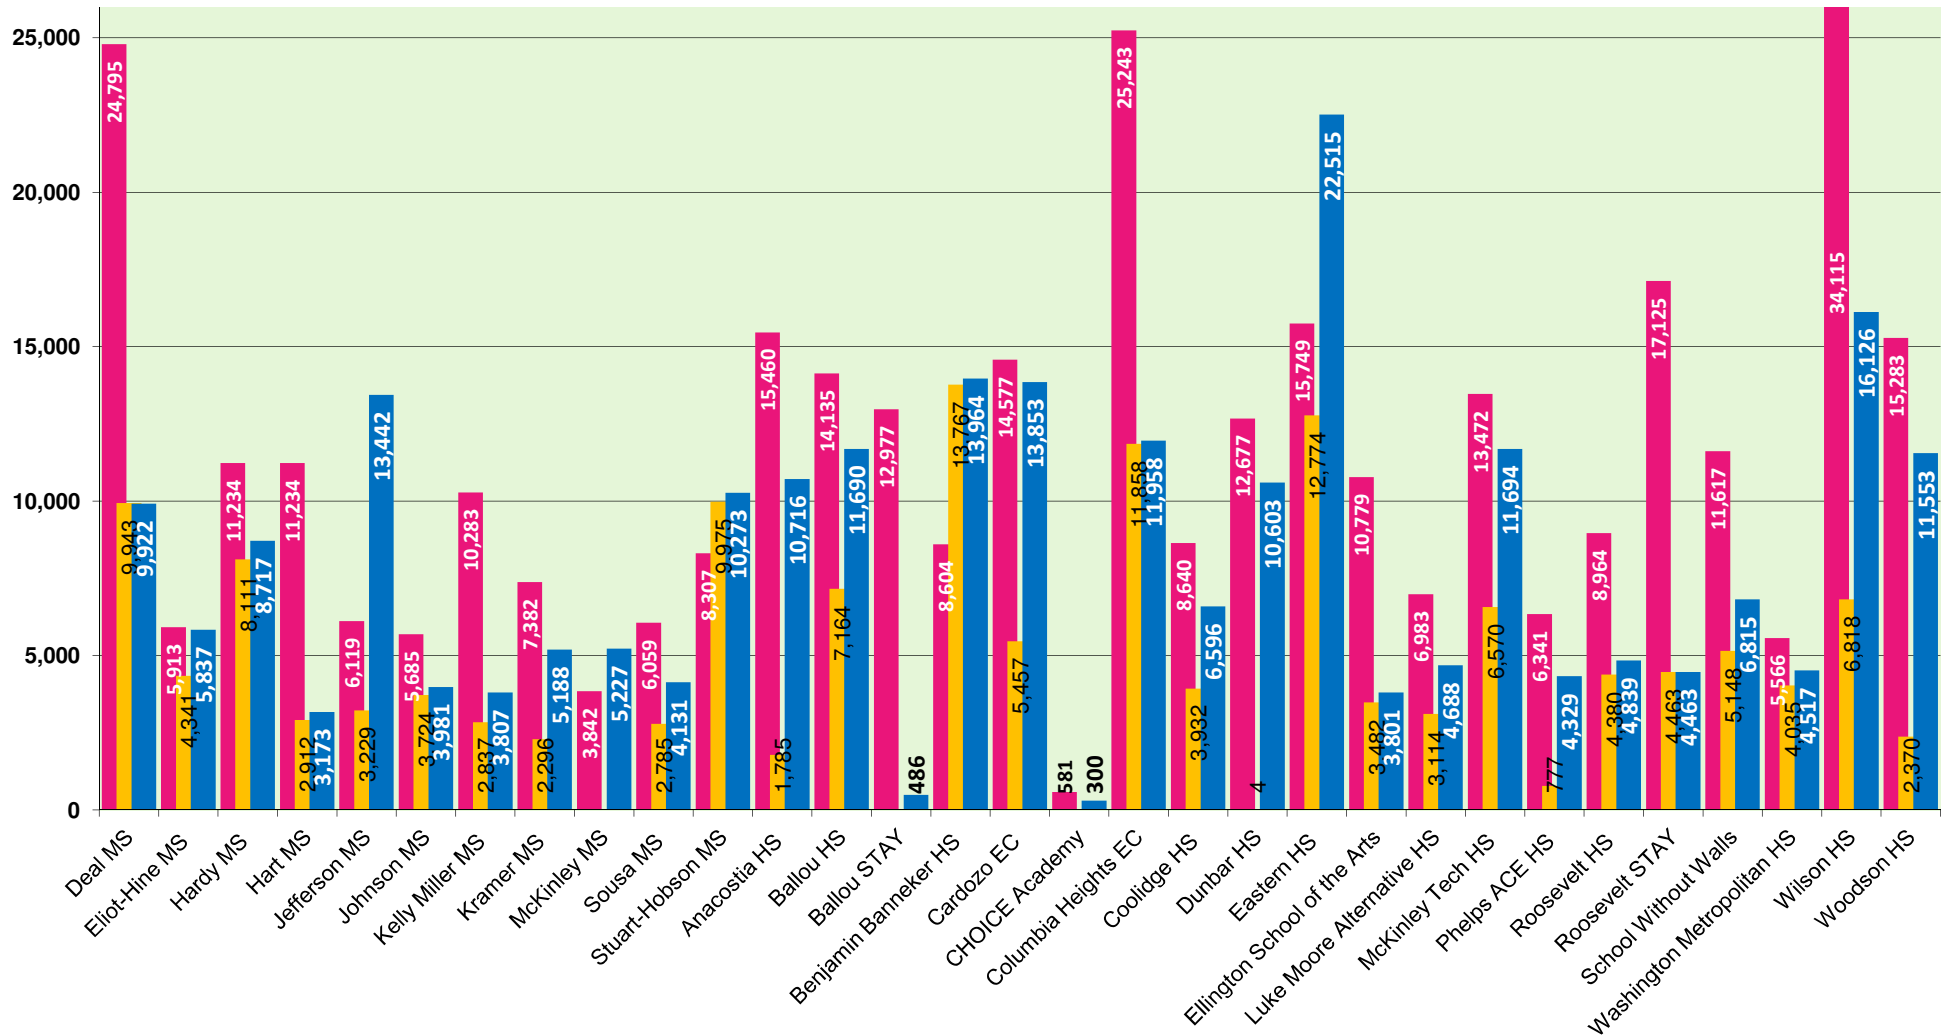

but when broken down into Dewey 10s, there maybe areas that need additional items

Average age represents the average publication date of the school's titles

Recommended average age is based on the several professional guidelines suggesting an average age of 10 years old.

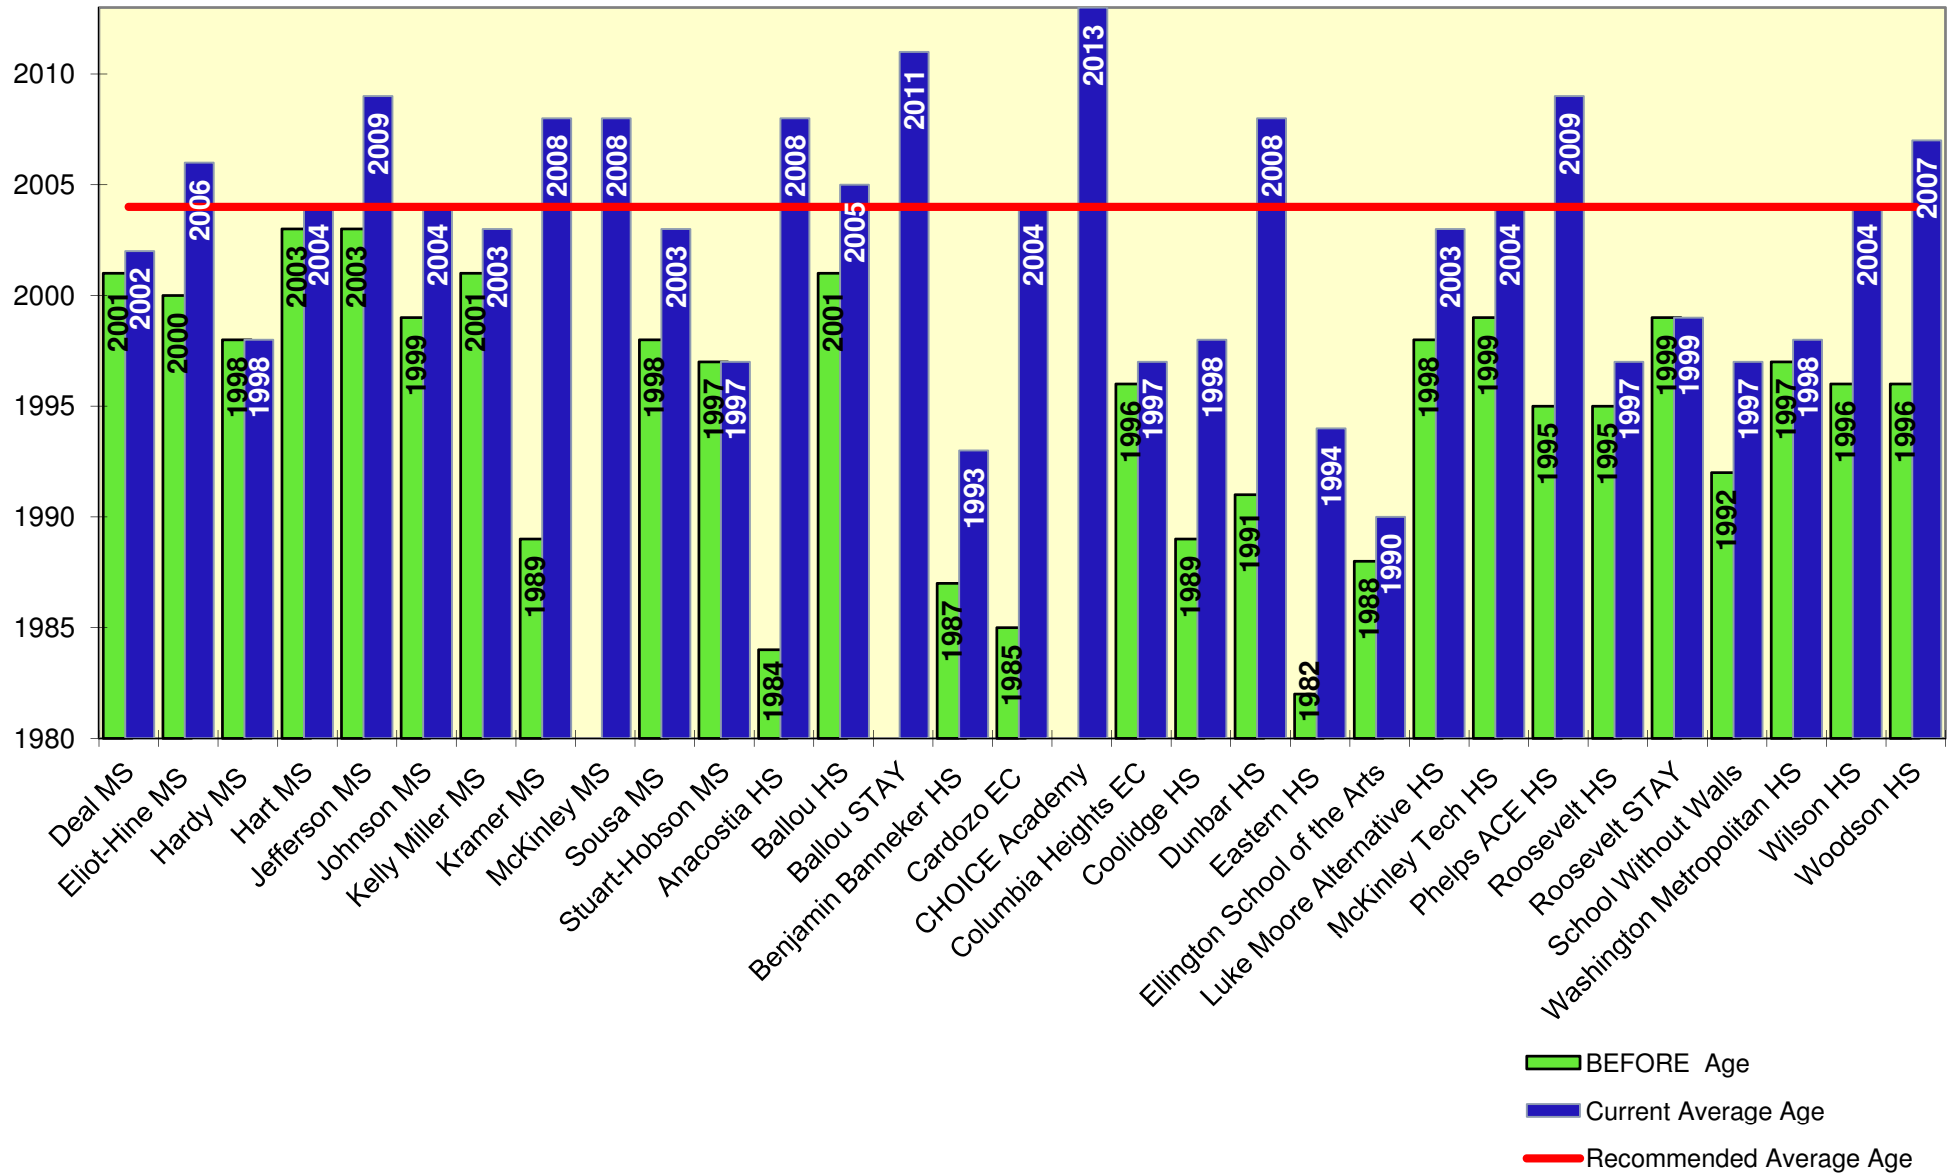

Age difference is the average age minus the recommended average age

## Column Definitions

The number of students in the school as provided by Pat Brown.

Total titles in collection that are classifiable with recognized call numbers.

Recommended number of items is based on 20 IPS

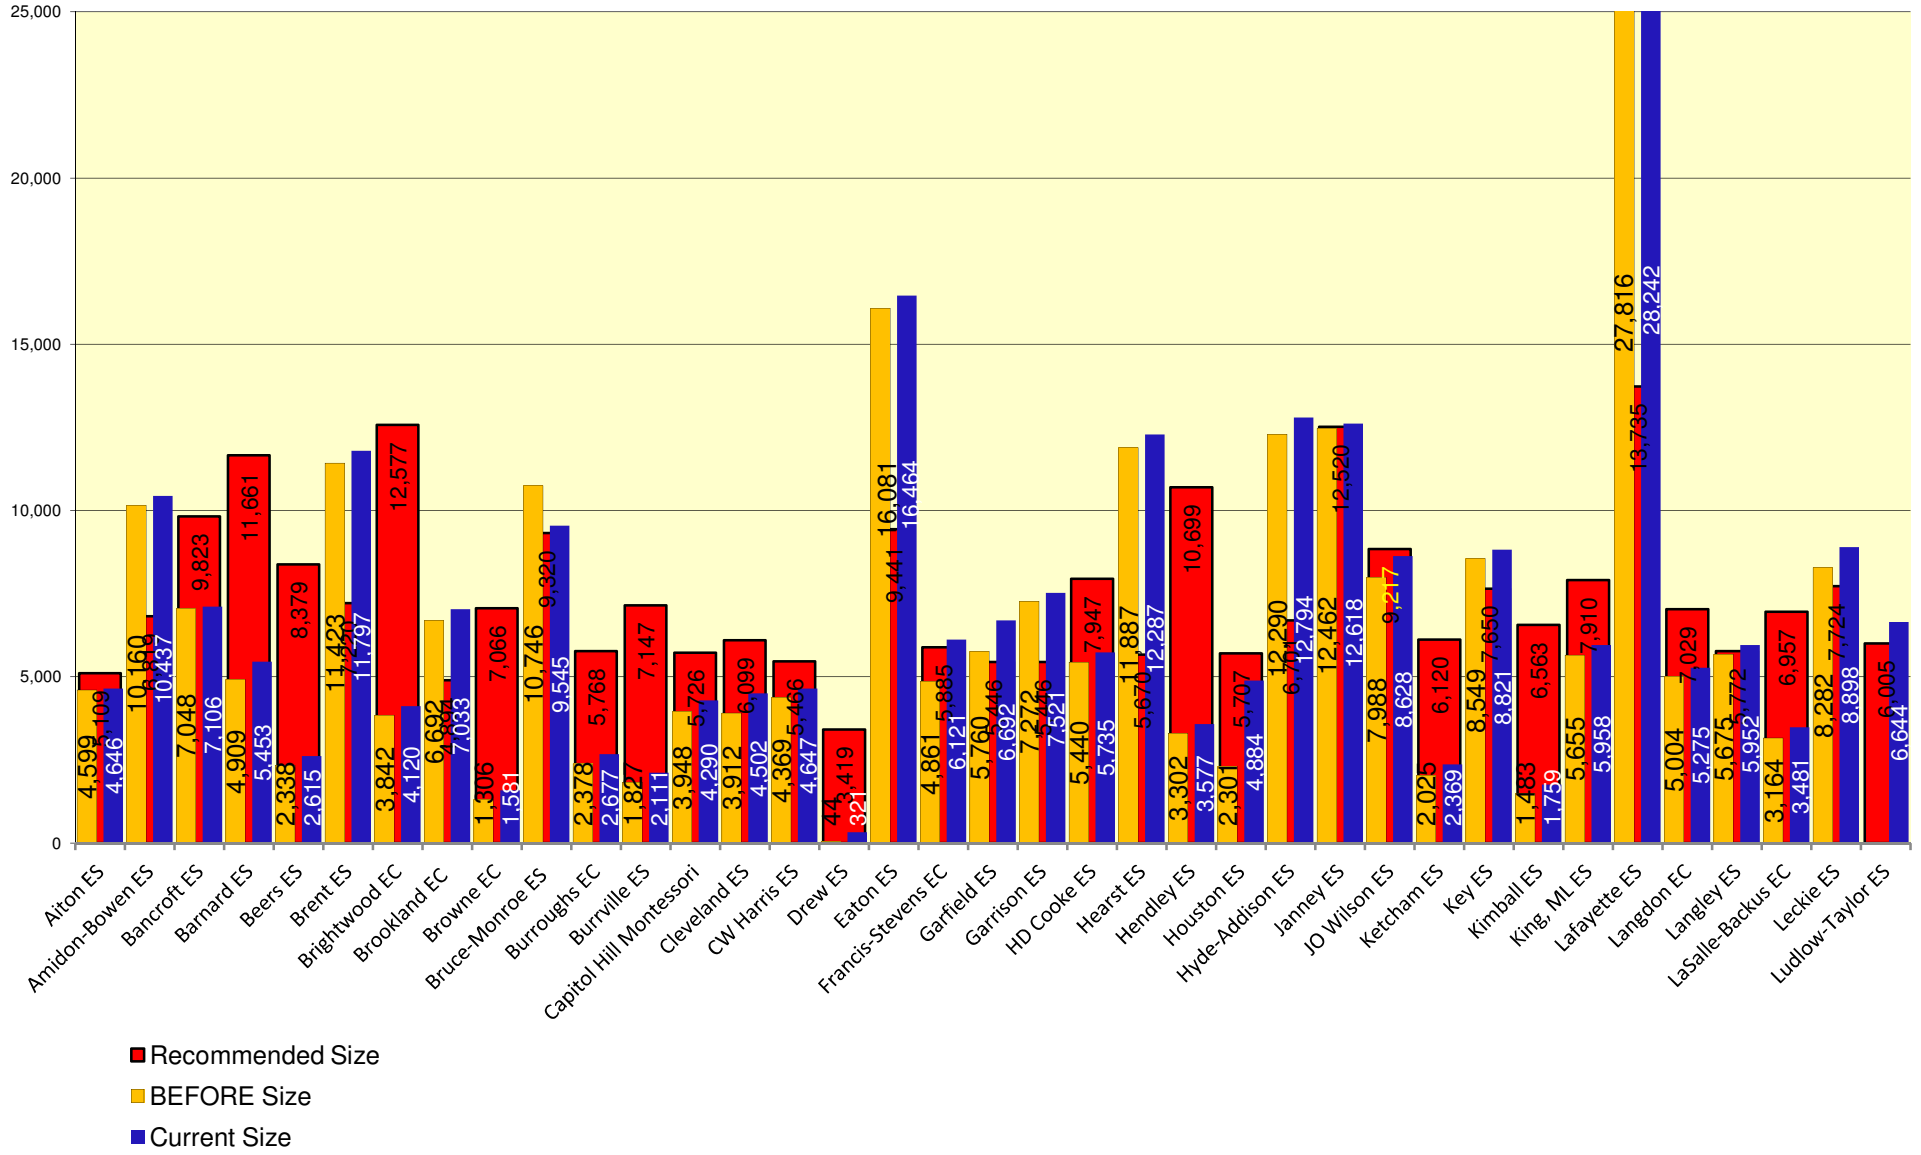

Additional items needed is the total of the Dewey 10's additional needed. Overall Dewey 100s may meet recommendations, but when broken down into Dewey 10s, there maybe areas that need additional items.

Average age represents the average publication date of the school's titles.

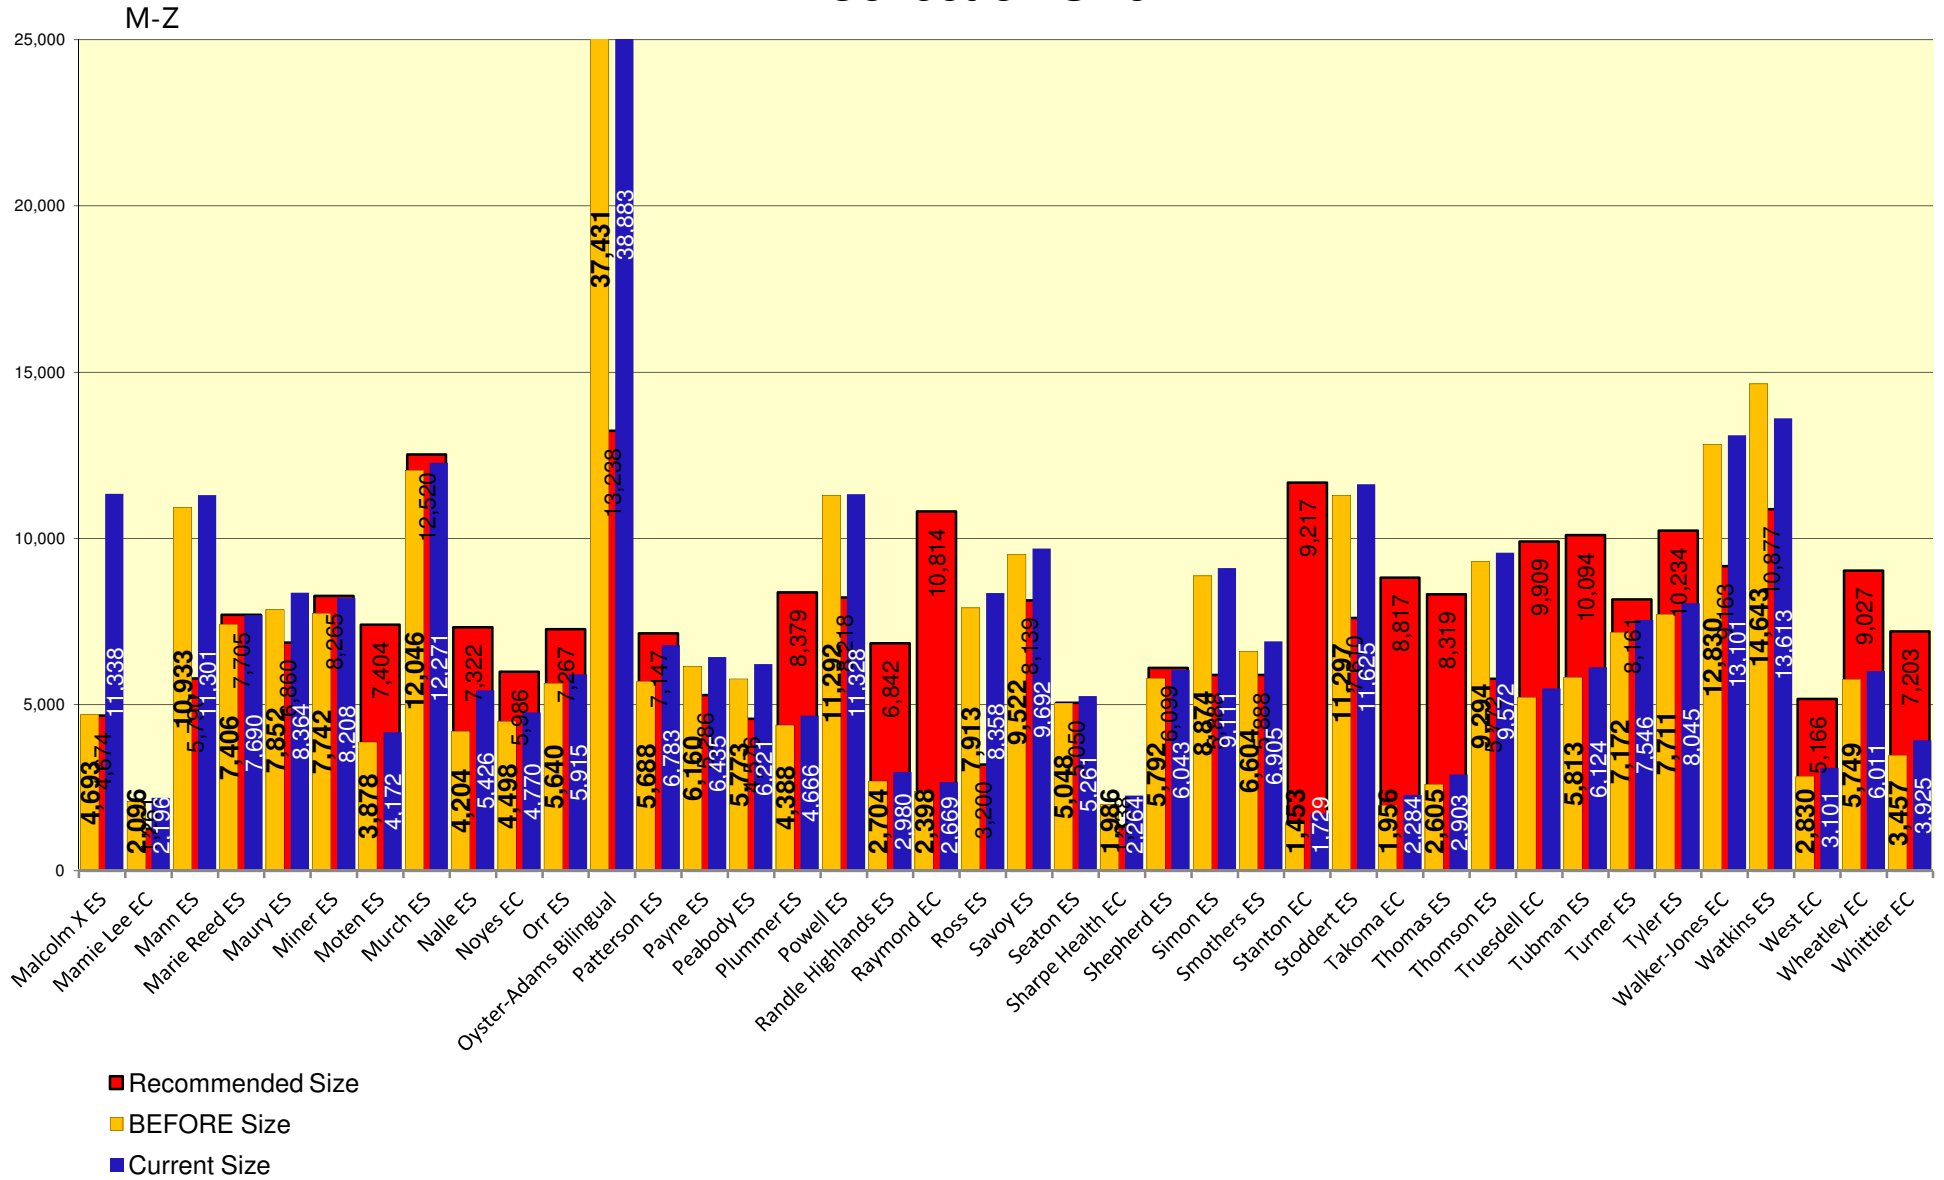

Recommended average age is based on the several professional guidelines suggesting an average age of 10 years old.

Age difference is the average age minus the recommended average age.
