

# Closing the Digital Divide: Devices

Students without a device or internet access at home will be provided the technology they need to participate in virtual learning.

In the spring, we **distributed over 10,000 devices**. At the start of the new school year, DCPS expects to have approximately **36,000 devices available** to support both virtual learning as well as in-school device needs.

Based on DCPS projections, 36,000 devices will allow us to **meet the digital needs of families if 40% of students** in grades K-12 need a device.
